

The **eSeries** eStations are part of Telecor's next-generation, full-featured, non-blocking **eSeries** Network Intercom system. The eStations combine proven intercom wall station design with Power-over-Ethernet technology which allows the eStations to receive power and communication data from a single Ethernet cable. This results in an intercom system that is easy to setup and maintain, requiring no network configuration or administration.

All you need to do is **Just Plug It In!**<sup>™</sup>

**Standard Features:**

- Station status and call indicator LED
- Relay output for control of ancillary devices
- Tamper-proof user buttons
- Vandal-proof speaker assembly
- Rugged 11 gauge stainless steel faceplate
- Powered by Power-over-Ethernet (PoE)
- Crystal clear High-Definition speech quality for optimum intelligibility

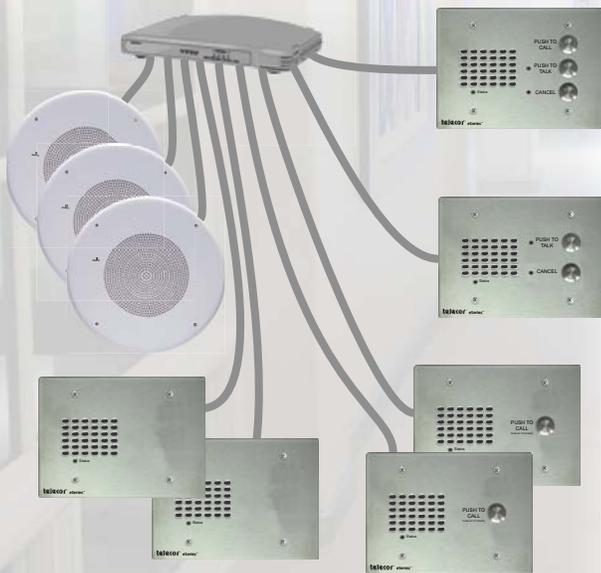

eStations are available in one, two, three, and no button models. A circular ceiling speaker model is also available. All models are capable of receiving calls and pages. Certain models also feature: placing call-ins, initiating pages, and providing a dry contact output (See chart).

eStations are immediately operational and ready for use once they are connected to a LAN. Additional configuration or programming of the eStations can be performed using an ePort, a device that connects to the LAN and to a laptop or desktop computer. The ePort can be used to configure individual eStations or to download/upload programming from all eStations for editing using a standard spreadsheet program.

The Telecor **eSeries** Network Intercom system can scale according to the facility's needs and size by adding the needed number of eStations. Taking into consideration the eStations' ease of installation, use, and maintenance, the Telecor **eSeries** Network Intercom is an affordable system suitable for almost any facility.

PoE LAN Switch

eStation Model*	Able to Place Calls-Ins	Able to Make Pages	Dry Contact Output Point
Ceiling Speaker	No	No	Yes
No Button	No	No	Yes
One Button	Yes	No	Yes
Two Button	No	Yes	No
Three Button	Yes	Yes	Yes

\*Part numbers are as follows: eS8 (Ceiling Speaker), eSTN-0 (No Button), eSTN-1 (One Button), eSTN-2 (Two Button), eSTN-3 (Three Button).
